PROFILE

Security researcher and Python developer focused on practical offensive-security automation, network forensics, agentic AI, and evidence-driven technical work. Builds operator-controlled systems that connect language-model reasoning to deterministic security tooling.

SELECTED RESEARCH & ENGINEERING

Cyber-CoPilot

2024 - PRESENT

Terminal-native, multi-agent offensive-security framework written in Python.

- 149 Python modules, approximately 70,500 lines of code, ten specialist agents, and 60+ MITRE-mapped tools.
- ReAct execution, ChromaDB target memory, typed discovery sharing, loop detection, and seven-strategy failure recovery.
- Human approval gates, scope enforcement, replayable logs, and automated Markdown/PDF reporting.

FlagSniff / PCAP Network Analyzer

2024 - PRESENT

Desktop network-forensics platform for packet inspection and automated threat detection.

- Combines stream reconstruction, suspicious-traffic detection, tool-using AI, RAG-assisted investigation, and report export.
- Designed for repeatable DFIR and CTF workflows with visualization, recovery controls, and detailed packet inspection.

EXPERIENCE

Penetration Tester / Security Researcher

DFRSC | 2024-2025

Conducted penetration tests and vulnerability assessments in a research environment; documented flaws and practical remediation guidance.

LLM Security / Prompt Engineering

Supportiyo | 2024-2025

Evaluated prompt injection, jailbreak, adversarial inputs, and robustness boundaries across deployed language and voice systems.

CTF LEADERSHIP

- 1st Place - UCP Takra CTF 2026
- 1st Place - Inter University Cyber Triade Battle
- Runner-Up - Cyber Battle Pakistan 2026

CORE CAPABILITIES

- Web application security and OWASP Top 10
- Network reconnaissance and attack-surface analysis
- PCAP analysis and digital forensics
- Agentic AI, RAG, and security automation
- LLM red teaming and adversarial testing
- Finding validation and technical reporting

TECHNOLOGY

- Python, NLP, ChromaDB, ReAct systems
- Burp Suite, Nmap, Metasploit, Wireshark
- Autopsy, FTK Imager, x32dbg
- Nuclei, SQLMap, Impacket, BloodHound
- Git, Linux, Windows, MITRE ATT&CK

CERTIFICATIONS

- Certified AppSec Practitioner - SecOps Group
- Certified Network Security Practitioner - SecOps Group
- Practical Ethical Hacker - TCM Security
- Certified White Hat Hacker - LGU
- Certified Computer Forensics Analyst - LGU

EDUCATION

B.S. Digital Forensics & Cyber Security

Lahore Garrison University
Candidate 2026
